

ABHISHEK MAURYA

Prayagraj, Uttar Pradesh, India | +91 9118396042 | maurya972137@gmail.com | Portfolio: <https://www.iabhishek.in/>

PROFESSIONAL SUMMARY

BCA graduate with hands-on experience in backend development, AI/ML, and configuration-driven project work, seeking to contribute as a Graduate Engineer Trainee. Skilled in requirement analysis, system testing, technical documentation, and issue resolution, built through an AI internship at Infosys Springboard, a Gen AI Hackathon win, and organizing large-scale technical workshops. Track record of process compliance, structured quality reviews, and clear stakeholder communication, with a fast-learning approach to new tools, technologies, and domains.

TECHNICAL SKILLS

Programming Languages: Python, Java (basics)

Web Frameworks: Django

AI/ML: scikit-learn (Random Forest, Decision Tree, Logistic Regression), OpenAI Whisper, Hugging Face Transformers, LLM APIs

Databases & Cloud: Supabase SDK

Developer & QA Tools: Git, GitHub, Postman, CI/CD basics

Documentation & Reporting: Technical/project documentation, requirement & status reporting, MS Office

Core CS & OS: Linux, OOPs, Operating Systems, DBMS fundamentals

KEY PROJECTS

Pronunex — AI-Based English Pronunciation & Speech Therapy Platform | *Django, React, PostgreSQL, Whisper, LLM*

- Backend & NLP Lead on a 6-module platform with 20+ REST APIs and 75+ frontend components; translated client-style feature requirements into working configurations for phoneme detection and adaptive practice.
- Configured and tuned audio-processing and scoring pipelines (Wav2Vec2 forced alignment, cosine similarity scoring, DTW) covering 44 English phonemes.
- Optimized backend performance, reducing repeated computation load.
- Authored the project's technical report and led a structured self-review that identified and documented issues (6 critical, 8 high) prior to submission, improving documentation accuracy and compliance.

AgriVision — AI-Powered Crop Disease Detection | *Flask, LLM* | *Gen AI Hackathon Winner*

- Engineered a vision-model + LLM pipeline that converts crop-disease predictions into natural-language treatment recommendations; awarded Gen AI Hackathon 2025 winner.

Student Performance Predictor | *Python, Django, Machine Learning*

- Built and deployed a Django web app using Random Forest, Decision Tree, and Logistic Regression to classify student performance (Low/Medium/High), with a real-time prediction interface.

EXPERIENCE

AI Intern / Trainee | *Infosys Springboard*

Jan 2026 – Mar 2026

- Developed backend APIs and NLP pipelines for Pronunex as part of a cross-functional team, following defined configuration and coding standards.
- Implemented audio preprocessing and phoneme alignment using Python, Whisper, and Hugging Face Transformers to generate real-time scoring and feedback, coordinating requirement changes with team leads.

Google Campus Ambassador | *Google*

Jul 2025 – Dec 2025

- Directed 5+ technical workshops on Google ecosystem technologies; managed community engagement and stakeholder communication across CMP Degree College.

Git & GitHub Workshop — Speaker & Organizer | *CMP Degree College, Prayagraj*

Apr 17, 2025

- Planned and delivered an offline workshop for 60–70 students covering version control, branching, and collaborative workflows, managing end-to-end logistics and documentation.

LEADERSHIP & ACHIEVEMENTS

- Gen AI Hackathon 2025 — Winner (AgriVision)
- Admin, "The Dev Hub" coding community; Founder, "B for BCA" YouTube channel (300+ subscribers) producing technical content
- Certifications: OCI AI Foundations (Oracle), Postman API Fundamentals, Java & C Programming (KG Coding)

EDUCATION

Bachelor of Computer Applications (BCA), University of Allahabad, Prayagraj	CGPA 8.29	Jun 2026
Intermediate (Class XII), Sarvajanic Inter College, Mungra Badshahpur, Jaunpur	69.6%	Jun 2022
High School (Class X), Dr. V. S. Pandey Girls Inter College, Baragaon Nibhapur, Jaunpur	79%	Jun 2020
